

# Farm area : milking machine

milking of cows

cleaning of udders and hygiene of work

## › a paper dispenser in the milking machine pit

This paper dispenser is supplied with a wall mount. It can also be suspended from the tubular of the milking machine.

It supports all sizes of paper rolls, up to 1000 sheets coils.

100% made of stainless steel 304L.

With simple and robust design, it ensures distribution of paper in the milking pit, dairy or workshop efficiently and without useless accessory.

Easy to maintain, a simple flick of water jet is enough for cleaning it.

We use high quality stainless steel (food compliant) for this product.

This stainless steel undergoes two surface treatments (quenching bath) :

- electropolishing : it makes the surface bright and reduce the adhesion of dirt.

- passivation: it makes the steel more resistant to corrosion and oxidation.

Conclusion : a clean and healthy equipment which will retain its quality for a long time.

All our products are welded using an assembly process of automobile production lines : spot welding without metal addition.

## › the strengths

- › 100% stainless steel 304L
- › suitable for all paper sizes
- › easy to fix
- › easy to maintain
- › robust design

## Factsheet

**The paper dispenser** is made of 304L stainless steel wire of diameter 6 mm with a stainless steel tube and plastic caps for the axis. The assembly is made as spot welding like in the automotive industry.

**Dimensions** : 230 x 325 x 430 mm
